

THE TREATMENT YOUR HEARING AIDS **NEED.**

WHAT IS REDUX?

Redux is a water-removal treatment system that leaves hearing aids sounding better in just a few minutes.

WHAT ARE THE BENEFITS OF DRYING MY HEARING AIDS WITH REDUX?

- Dry hearing aids sound better and require fewer repairs
- Your hearing aids have an 80% chance of improving in sound quality after a Redux treatment.
- If you have 'dead' hearing aids, they have a 50% chance of being revived after a Redux treatment.

I AM CAREFUL WITH MY HEARING AIDS AROUND WATER. WHY DO I NEED A REDUX TREATMENT?

Your ear is a hot, humid place. The speaker in your ear collects unavoidable moisture from humidity, perspiration, and condensation. This often leads to a reduction in sound volume and clarity, and it will eventually cause hearing aids to stop working no matter how careful you are around water.

HOW MUCH MOISTURE DOES IT TAKE TO CAUSE PERFORMANCE ISSUES IN A HEARING AID?

.5uL

Can cause up to a 30dB decline.

1uL

Comparable to 3 bathtubs of water in a typical home.

10uL

Can cause complete aid malfunction.

HOW LONG DOES A REDUX TREATMENT TAKE?

On average, Redux can completely dry hearing aids in under 9 minutes.

HOW LONG DO THE POSITIVE EFFECTS OF A REDUX TREATMENT LAST?

Typically, a hearing aid will perform optimally for 2-3 months after a Redux treatment.
